Damage code	**Cause**	**Remedy**	
82 801 90	ℹ When the ignition is switched on (circuit 15), the engine control unit sends a start enable request to the DAS [FBS] control unit. If during this request circuit 15 is switched off or interrupted before the DAS [FBS] control unit could respond, the variable code sent the first time is used again the next time circuit 15 is switched on, since the original request is saved by the DAS [FBS] control.	1 Replace the DAS [FBS] control unit.	AR54.21-P-1300GH
	ℹ The fault message "Start Error" appears in instrument cluster.	ℹ When ordering a new control unit, please specify the chassis number.
